

PRULink Asian Multi-Asset Fund

All data is as of 31 December 2022 unless otherwise stated

Features of Fund	
Investment Objective	<p>PRULink Asian Multi-Asset Fund (“The Fund”) aims to provide income and capital growth over the medium to longer term, where any income paid will be reinvested in The Fund. The Fund aims to provide exposure to a diversified portfolio consisting primarily of Asian equities and Asian fixed income securities.</p> <p>At inception, The Fund will invest into Schroder Asian Income (SGD Class), which is the ‘Target Fund’.</p> <p>The Fund may also invest in any other funds with similar objective that may be available in the future.</p>
Investment Strategy & Approach	<p>Investment Strategy</p> <p>The Fund will invest in a collective investment scheme which provides exposure to a diversified portfolio consisting primarily in Asian equities and Asian fixed income securities.</p> <p>Investment Approach</p> <p>The Target Fund will actively allocate between Asian equities, Asian fixed income securities, cash and other permissible investments to achieve its objective. The Target Fund will use a cyclical approach to asset allocation where the asset mix will be adjusted according to the four phases of the economic cycle – recovery, expansion, slowdown and recession – based on a combination of fundamental and quantitative factors such as asset class valuation, macroeconomic data and liquidity. Cash will be treated as a separate asset class and will be deployed if necessary to limit downside risk during adverse market conditions.</p> <p>The Target Fund will also perform active security selection for its investments in Asian equities, Asian fixed income and other permissible investments. For the Asian equities portfolio, the Target Fund intends to focus on companies that are able to create true shareholder value, have a strong and stable earnings stream and have a strong sustainable dividend yield. For the Asian fixed income portfolio, the Target Fund intends to select securities that deliver attractive yield and capital growth taking into account both fundamental and technical views such as valuation, demand/supply conditions and liquidity. The Target Fund may invest up to 10% of its assets in China A-Shares through the Stock Connect.</p> <p>The Target Fund will also manage the impact of interest rate movements on the value of the portfolio.</p>
Asset Allocation	<p>The Fund invests a minimum of 95% of The Fund’s NAV in the Target Fund(s) determined by The Fund Manager. The Fund will also invest a maximum of 5% of The Fund’s NAV in liquid assets.</p>

Additional disclosure for PRULink Asian Multi-Asset Fund

PRULink Asian Multi-Asset Fund invests into Schroder Asian Income (SGD Class), which is managed by Schroder Investment Management (Singapore) Ltd.

Management fees may be charged at The Fund and/or Target Fund(s) level. Please note that you will be charged a maximum of 1.50% p.a., being the combined annual fund management charge at The Fund and Target Fund(s) levels. Target Fund(s) with investment strategies to invest in Exchange Traded Funds (“ETF”) or other Collective Investment Schemes may incur additional expenses at the Target Fund(s) level which is taken as part of the investment strategy considerations to deliver The Fund performance.

The performance of the Target Fund, Schroder Asian Income (SGD Class) as at 31 December 2022 is as follows:

Year	2022	2021	2020	2019	2018	2017	2016	2015	2014	2013
Net Performance	-15.52%	4.86%	1.20%	10.64%	-4.37%	8.96%	6.94%	-0.94%	12.68%	-0.83%*

*Fund Performance is from fund launch date until year end of the same year (non-annualised return).

Note: The above return is for Target Fund SGD Class

Source: Bloomberg, 31 December 2022

Notice: Past performance is not an indication of its future performance. This is strictly the performance of the investment/underlying funds, and not the returns earned on the actual premiums paid of the investment-linked insurance product.

Basis of calculation of past performance:

$$= \left(\frac{\text{Net Asset Value for Year } n}{\text{Net Asset Value for Year } n - 1} - 1 \right) \%$$

Investment Risks

The Fund is subjected to investment risks including the possible loss of the principal amount invested. The value of the units may fall as well as rise. In addition, The Fund is subjected to specific risk including and not limiting to:

General Risks when Investing in The Fund

Market Risk in Asia

The value of investments by The Fund may go up and down due to changing economic, political or market conditions, or due to an issuer’s individual situation. Emerging markets, especially frontier markets, generally carry greater political, legal, counterparty and operational risk.

Risk of Non-Compliance

This risk arises from non-compliance with laws, rules and regulations, prescribed practices and the management company’s internal policies and procedures, for example, due to oversight by the management company. Such non-compliance may force the management company to sell down the securities of The Fund at a loss to rectify the non-compliance and in turn affect the value of investors’ investment in The Fund. To mitigate this risk, The Fund Manager has put in place internal controls to ensure its continuous compliance with laws, rules and regulations, prescribed practices and The Fund Manager’s internal policies and procedures.

PRULink Asian Multi-Asset Fund

All data is as of 31 December 2022 unless otherwise stated

Inflation Risk

This risk refers to the likelihood that an investor's investments does not keep pace with inflation, thus resulting in the investor's decreasing purchasing power even though the investment in monetary terms may have increased.

Currency Risk

The Fund is denominated in MYR, while the Target Fund(s) may be denominated in other currencies. The performance of The Fund may be affected by movements in the exchange rate between the MYR and the Target Fund(s)'s denominated currency. Where applicable, a currency hedge or a currency hedged class of fund may be used to minimise currency risk.

Derivatives Risk

Derivatives may potentially be used to hedge against any risk that may be derived from investing in the Target Fund(s), such as, but not limited to, currency risk.

Fund Management of the Target Fund Risk

While the Fund Manager will exercise due skill and care in selecting the Target Fund, it does not have control over the management of the Target Fund and there is no guarantee that the investment objective of The Fund will be met. This may affect the value of the policyholders' investments in The Fund.

The Target Fund may change its objective and become inconsistent with the objective of The Fund. In such instances, The Fund Manager will replace the Target Fund with another collective investment scheme which The Fund Manager considers to be more appropriate in meeting the objective of The Fund.

Specific Risks when Investing in the Target Fund

Counter Party Risk

The counter party to a derivative or other contractual agreement or synthetic financial product could become unable to honour its commitments to the Target Fund, potentially creating a partial or total loss for the Target Fund.

Liquidity Risk

There is no secondary market for Target Fund. All redemption requests should be made to The Fund manager or its appointed agents.

Currency Risk

The Target Fund(s) or its Sub-Fund(s)'s underlying investments may be denominated in their local currency, which may differ from the Target Fund(s) or its Sub-Fund(s)'s currency of denomination. The performance of the Target Fund(s) or its Sub-Fund(s) may be affected by movements in the exchange rate between the local currency of its underlying investments and the Target Fund(s) or its Sub-Fund(s)'s denominated currency.

Derivatives Risk

The Target Fund Manager(s) or its Sub-Fund Manager(s) may invest in derivatives which will be subject to risks. While the judicious use of derivatives by professional investment managers can be beneficial, derivatives involve risks different from, and, in some cases, greater than, the risks presented by more traditional securities investments. Some of the risks associated with derivatives are market risk, management risk, credit risk, liquidity risk and leverage risk. Investments in derivatives may require the deposit or initial margin and additional margin on short notice if the market moves against the investment positions. If no provision is made for the required margin within the prescribed time, the investment may be liquidated at a loss. Therefore, it is essential that such investments in derivatives are monitored closely.

PRULink Asian Multi-Asset Fund

All data is as of 31 December 2022 unless otherwise stated

The Target Fund Manager(s) or its Sub-Fund Manager(s) has the necessary controls for investments in derivatives and have in place systems to monitor the derivative positions for the Target Fund(s) or its Sub-Fund(s). The Target Fund Manager(s) or its Sub-Fund Manager(s) does not intend to use derivatives transactions for speculation or leverage but may use them for efficient portfolio management and/or risk management. Currency risk is simply one of the market risks which The Fund will be exposed to and can be hedged using derivatives such as FX forwards/futures. Often the underlying currency risk may be taken on as a result of buying an underlying equity or bond. If the Target Fund Manager(s) or its Sub-Fund Manager(s) does not want to also take the currency risk associated with these underlying assets, the Target Fund(s) or its Sub-Fund(s) may use Forward Foreign Exchange contracts to hedge any currency risk derived from holdings of non-base currency positions. Essentially this use of currency forwards is to hedge currency risk in the Target Fund(s) or its Sub-Fund(s).

Equity Risk

Equity prices fluctuate daily, based on many factors including general, economic, industry or company news.

Credit Risk

There is a risk that investment grade securities that Target Fund invests in may be downgraded due to adverse market conditions. Target Fund may invest in debt securities below investment grade which are generally accompanied by a higher degree of counterparty risk, credit risk and liquidity risk than higher rated, lower yielding securities. Investment in unrated debt securities may be subject to risks similar to those associated with below investment grade debt securities.

Operational Risk

Failures at service providers could lead to disruptions of fund operations or losses.

The above should not be considered to be an exhaustive list of the risks which potential policyholders should consider before investing in The Fund. Potential policyholders should be aware that an investment in The Fund may be exposed to other risks of exceptional nature from time to time.

PRULink Asian Multi-Asset Fund

All data is as of 31 December 2022 unless otherwise stated

Risk Management

Monitoring processes are in place to assess performance of the Target Fund and its adherence to the objectives of The Fund. If the Target Fund changes its objectives and/or becomes misaligned to the objectives of The Fund; or if performance of the Target Fund is consistently poor, The Fund Manager will replace the Target Fund with another collective investment scheme of similar objective.

Target Fund:

Schroders uses several risk management in-house tools specifically designed for use within multi-asset portfolios.

1. Schroders Multi-Asset Risk Technology (SMART)

SMART models the optimal allocation to assets and active strategies required in order to achieve a portfolio's objective. The team uses this tool to determine the extent of active risk (alpha) and market risk (beta) separately, in order to extract greater return from investment strategies.

2. Fixed Income Analytics (FIA)

Fixed Income Analytics is the global strategic platform for delivering portfolio analytics and security data to internal Fixed Income, Emerging Market Debt and Commodity clients. It has the following capabilities:

- Internal analysis tool for reporting daily positions, market values and spread information.
- Provides daily risk data (allocation, interest rate, credit, FX risk) to The Fund managers and monitoring staff.
- Provides start of day portfolio and benchmark position data.
- Individual security level analytics.
- Flexible reporting, ability to build up from security level data into custom aggregation buckets such as duration, credit rating, maturity buckets, etc.

3. Portfolio Risk Investment Strategy Manager (PRISM)

PRISM is an in-house application which identifies active risk, size, beta, non-index positions and sources of risk by decomposing portfolios into stock specific, sector and characteristic exposures. Risk based PRISM data is sourced from Style Research which is an external system. Details are also provided on a portfolio's exposure to style characteristics. Information about both stock and asset diversification is displayed as marginal contribution to tracking error. PRISM also allows fund managers to assess the probable impact of decisions on the total risk profile of a portfolio, thus looking forward at the effect of potential strategies.

Other Info

- Target Market

Policyholders who:

- Seek capital growth;
- Understand the risks associated with investing in Asian equities and Asian fixed income securities; and
- Have moderate to high risk tolerance.

- Basis & Frequency of Unit Valuation

- Unit pricing is done daily.
- The Unit Price of a particular **PRULink** Global Fund on any Valuation Date shall be equal to The Fund Value divided by the number of Units in issue on Valuation Date.
- The Fund Value is the value of all the assets of a particular **PRULink** Global Fund after the deduction of expenses for managing, acquiring, maintaining and valuing the assets of that fund, tax (if any) or other statutory levy incurred by the Company on investment income or capital gains on the assets of The Fund and any accrued or anticipated income.
- The valuation date shall be the date as determined by Prudential from time to time, but not less frequently than once a day, for the purpose of determining unit prices.
- The Company shall value the various **PRULink** Global Funds at the close of each business day (Valuation Date). However, as the value of the **PRULink** Global Funds' investments in various shares, fixed interest securities and money market instruments at the close of a particular Valuation Date will only be known a business day later, the determination by the Company of the Unit Price of a **PRULink** Global Fund in respect of a particular Valuation Date shall only be conducted and made known to the Policyholder 2 business days later (T + 2).
- To recoup the cost of acquiring and disposing of assets, a transaction cost adjustment may be made to The Fund Value to recover any amount which The Fund had already paid or reasonably expects to pay for the creation or cancellation of units.

- Exceptional circumstances

- The Company shall not be bound to redeem and convert on any Valuation Day more than 10% of any **PRULink** Global Fund outstanding on such Valuation Day.
- The Company reserves the right in exceptional circumstances (for example, when there is an unusually high volume of sale of investments within a short period) to defer the switching or withdrawal of Units and the surrender of the Policy for a period not exceeding six (6) months from the date of application.
- The Company may suspend unit pricing and policy transaction if any of the exchanges in which The Fund is invested is temporarily suspended for trading. In such event, notice for suspension may be published and may be communicated to the Policyholder upon any request for top-up, switching, redemption or withdrawal to/from any such **PRULink** Global Fund.

The list of exceptional circumstances above are not exhaustive, please refer to your policy document for further details.
