#### **How PRUCash Enrich works?**

 Sam chooses PRUCash Enrich because this plan allows him to determine the Guaranteed Maturity Benefit (GMB) he will receive 30 years later. Furthermore, he may potentially receive additional bonus<sup>1</sup> upon maturity.

 He has the choice of multiple premium payment term options. After careful consideration, he decides on a premium payment term of 5 years so that he can focus on other financial commitments. For financial security, he also chose to purchase **Life Assured Waiver Plus**, where future premiums would be waived in the event of Sam passing away, suffering from TPD<sup>2</sup> or being diagnosed with any of the covered 42 Critical Illnesses.

He pays a premium of **RM5,528.53** per month and appoints his wife as both the **Alternate Assured** and **Alternate Life Assured**.

Throughout the policy term, PRUCash Enrich provides Sam annual guaranteed cash payments every year. The guaranteed cash payment is shown in the table below:

End of Policy Year	1 – 10	11 – 20	21 – 29	30
Survival Benefit (% of Guaranteed Maturity Benefit)	4%	8%	12%	40%

Sam can choose to receive the annual guaranteed cash payments or accumulate them with Prudential as another portion of his savings.

#### If Sam survives until policy maturity

Sam will receive the annual guaranteed cash payments throughout the policy term as long as he continues to pay his premium until the end of premium payment term.

Upon maturity of this policy, he may receive RM447,3943 in total, consisting of RM40,000 (i.e. the final year guaranteed cash payment), and Maturity Benefit of RM407,394 (RM100,000 GMB plus RM307,3943 non-guaranteed bonus payable on maturity).

## In the event that Sam passes away before policy maturity

Unfortunately, Sam passed away at policy year 5. RM5,000 compassionate benefit will be payable to his family. His wife, as an Alternate Assured and Alternate Life Assured, will now become the Assured and Life Assured of the policy, and continue to receive the annual guaranteed cash payments without the need to pay premium.

Upon maturity of this policy, she may receive **RM447,394**3 in total, consisting of RM40,000 (i.e. the final year guaranteed cash payment), and Maturity Benefit of RM407,394 (RM100,000 GMB plus RM307,3943 non-guaranteed bonus payable on maturity). Even though Sam has passed away, his family's financial future is secured.

-----

The above example is for illustrative purposes only and calculated based on age 35, Male Non-Smoker, 5 Pay 30, with GMB of RM100,000, with Life Assured Waiver Plus.

Guaranteed annualised return (net gain/loss) if held to maturity is 0.52% p.a. The total annualised return (net gain/loss) if held to maturity under high scenario (investment rate of return at 5% p.a.) is 3.18% p.a., low scenario (investment rate of return at 2% p.a.) is 0.52% p.a.

<sup>1</sup>Bonus consists of Terminal Bonus and will be paid as a lump sum upon maturity or surrender. This bonus is not guaranteed and will depend on the actual operating and investment results experienced by Prudential's participating life fund.

<sup>2</sup>Prior to the Policy Anniversary of age 70.

<sup>&</sup>lt;sup>3</sup>The projected Maturity Benefit is based on high scenario assuming the participating life fund earns 5% (gross of tax and expenses) every year. Under low scenario assuming the participating life fund earns 2% (gross of tax and expenses) every year, he may receive RM140,000 in total upon maturity, consisting of RM40,000 (i.e. the final year guaranteed cash payment), and Maturity Benefit of RM100,000, consisting of guaranteed benefit only.
