

PRULink Golden Equity Fund II

All data is as of 31 December 2019 unless otherwise stated

Features of Fund	
Investment Objective	To maximise returns over medium to long term, taking into account the need to meet guaranteed payouts. This is achieved by investing in high quality shares listed on the Bursa Malaysia and any other financial instruments to be used for hedging the portfolio.
Investment Strategy & Approach	<p>Investment Strategy Invest in high-quality shares listed on the Bursa Malaysia directly or indirectly through PRULink Fund, which invests principally in a diversified portfolio of equities and equity-related securities, that may become available in the future. The fund may also invest in any other financial instruments to be used for hedging the portfolio.</p> <p>Investment Approach The Fund Managers believe their disciplined, valuation-driven investment style can generate superior long-term returns.</p> <p>Pricing inefficiencies driven by irrational investor behavior can be successfully exploited through active in-house research and portfolio management. Successful and sustainable exploitation of security mis-pricing requires the disciplined application of their valuation driven approach. Their process seeks to eliminate the behavioral biases that lead to mispricing in the first instance.</p> <p>The Fund Manager imputes conservative assumptions to their earnings forecasts to ensure that the in-house valuation target is achievable. At the same time they are not eliminating potential opportunities by taking calculated risk in periods of volatility that tend to be event driven.</p> <p>The Fund Managers aim for a high degree of consistency in long term performance for all funds, whilst adhering to strict and professional investment guidelines.</p>
Asset Allocation	The Fund invests up to 100% of the Fund's NAV in shares listed on the Bursa Malaysia directly or indirectly through PRULink Funds, which invests principally in a diversified portfolio of equities and equity-related securities, which may become available in the future. The balance of the Fund's NAV will be invested in liquid assets and any other financial instruments to be used for hedging the portfolio.

PRULink Golden Equity Fund II

All data is as of 31 December 2019 unless otherwise stated

Notice: Past performance is not an indication of its future performance. This is strictly the performance of the investment/underlying funds, and not the returns earned on the actual premiums paid of the investment-linked insurance product.

Basis of calculation of past performance:

$$= \left(\frac{\text{Net Asset Value for Year } n}{\text{Net Asset Value for Year } n - 1} - 1 \right) \%$$

Investment Risks

- (E) Country Risk
- (F) Risk of Non-Compliance
- (G) Concentration Risk
- (H) Management Company Risk
- (I) Inflation Risk
- (J) Investment Managers' Risk

Risk Management

Forecasting Risk

Potential risks are taken into consideration in the process of sector allocation and stock selection based on analysis on various key factors such as economic conditions, liquidity, qualitative and quantitative aspects of the securities.

System Control

Risk parameters are set internally for each fund, depending on client's risk profile. These risk parameters include limits of issuer bet, group issuer, sector rating and issue size of the securities held in the portfolio.

A front-end office system is in place to monitor portfolio risks, serving as an auto filter for any limitations or breaches.
